- Heating
- Ventilation and Air-conditioning systems
- Water treatment, water supply and water preparation
- Swimming Pools
- Design and equipment for bathrooms
- Industrial and commercial cold
- Bathrooms and kitchens

Exhibitor feedbacks:

Tuğba Demir, Assistant Expert of the Turkish HVAC-R Association - ISIB

The Association participated for the first time at the Aquatherm Tashkent 2021 exhibition. The exhibition was effective for us. We were very surprised by the hospitality of the Uzbek people in the face of visitors. This exhibition is an important event for us. I thank the organisers for organising the exhibition and see you at Aquatherm Tashkent 2022.

Alexey Glukhov, Project Manager of Art Climate/Gree:

The organisation of the exhibition is at a fairly high level. Everything is organised competently, with taste and quite comfortable. Participation in the exhibition is a little difficult to evaluate at the moment, we will evaluate it next week based on the results of incoming contacts. But at the moment the number of visitors is quite large, we assess the participation very productively. We hope that participation in this exhibition will pay off for us and bring us more interesting projects, more work and, accordingly, the development of our company.

Tarik Yilmaz, CEO, Mimsan (Turkey):

The company has been operating in Uzbekistan under the Mimsan brand for 3 years. We produce boilers here and we participate in the exhibition at the invitation of the organisers. Our stand was constantly crowded with visitors not only from Uzbekistan, but also from neighbouring Central Asian countries. We really liked the exhibition. I express my gratitude to the organisers of the exhibition for the excellent organisation.

Batyr Abdullaev, Development Manager for Uzbekistan, Turkmenistan and Tajikistan, Grohe

We have been cooperating with Iteca Exhibitions for a long time and have been exhibiting at Aquatherm Tashkent for a long time. It justifies itself, but not immediately. There are moments that have a pending demand. We do not always sign contracts for some projects, but in any case, we see the interest that visitors and guests have, who come to our stand, communicate, and ask questions. Therefore, we consider the Aquatherm Tashkent exhibition as one of the important sites where we can declare ourselves, talk about our new products, about what is happening in our company. The organisation of the exhibition is always at a very good, decent level. I would like to express my gratitude to the organising committee for the fact that, despite the change of the venue 1.5 months before the exhibition, everything was organised correctly, we were notified in advance and shown our place on the site. Therefore, I believe that there were no problems with the organisation.

Emre Kandemir, Sales Manager, Thermofan (Turkey):

It was important for our company to participate in the Aquatherm Tashkent 2021 exhibition as a manufacturer from Turkey. The exhibition is held at a high level and our presence in the Uzbek market is important for our company.
